RFm Wireless Interface

Categories: M-Hand Tools, Metrology · **Brand:** Crane Electronics

Description

The RFm wireless interface allows CheckStar Multi series transducers to be connected to the IQVu reader, enabling in-process testing without the clutter of cables that would otherwise prevent such operations.

RFm acts as a data logger, storing up to 200 samples in case the IQVu tablet reader is out of range (approximately 10 meters), and automatically synchronizes the data as soon as the connection is reestablished.

The internal battery is easily rechargeable via the mini-USB port.
