UBX-AF-PHOENIX Cordless Screwdriver with Hydraulic Impact Mechanism

Categories: Controlled Electronic Screwdriving, M-Hand Tools · **Brand:** Uryu

Description

Cordless screwdrivers equipped with the newly designed Phoenix hydraulic impact mechanism, a contactless magnetostrictive transducer, and an encoder.

Features

The new springless hydraulic impact wrench design improves performance compared to conventional hydraulic impact wrenches

- More powerful
- Minimizes temperature-related variations
- No preparation or preheating is required before use
- 16 programmable channels

Improved Service Life

The low oil pressure inside the pulse unit reduces pressure on the seals, minimizing leaks.
The newly designed Auto-Relief (patent pending) is not affected by deterioration in oil viscosity.
The large LED indicator allows operators to immediately check the OK/NOK status from any position.
Instant torque reading and torque curve displayed on the screen
The pairing of the screwdriver and controller can be configured using 3 methods:
1. Manual pairing via DIP switches
2. Pairing via software
3. Wi-Fi (Zigbee) pairing
Performs 320 screwdriving operations with a 100% charged battery
* The torque range is an approximate value. Select the appropriate tool based on the actual application

Via della Resistenza, 53 20090 Buccinasco (MI) - Italia | C.F./P. IVA 01870750161 - CCIAA BG 243678

** The battery and charger are not included. Please use EY0L82 (Panasonic) for the charger.
*** Calculated under URYU test conditions. May vary depending on usage conditions.

Brand

Uryu

Founded in February 1915, Uryu specializes in the design and manufacture of high-quality, reliable industrial tools.

Throughout its history, the company has developed a comprehensive line of pneumatic, electric, and electronic tools for a wide range of industrial sectors. The company is particularly well-known for its hydraulic impact screwdriving solutions, which are available with pneumatic, corded electric, and battery-powered power sources.
