UA-T Screwdriver with Automatic Shut-Off

Categories: Impact Wrenches with Torque Control, M-Hand Tools · **Brand:** Uryu

Description

Hydraulic impact mass with new, patented "auto-relief" technology.

Improved accuracy on rigid and elastic joints
Reduced tightening times and resulting energy savings
Reduced maintenance costs.
Recommended pressure: 0.6 MPa; Recommended hose diameter: UAT-30-UAT90 8 mm ID / UAT-100-UAT200 11 mm ID
"TM" suffix for models with a pneumatic signal
Bolt shank clamping capacity: 4-5 mm

Brand

Uryu

Founded in February 1915, Uryu specializes in the design and manufacture of high-quality, reliable industrial tools.

Throughout its history, the company has developed a comprehensive line of pneumatic, electric, and electronic tools for a wide range of industrial sectors. The company is particularly well-known for its hydraulic impact screwdriving solutions, which are available with pneumatic, corded electric, and battery-powered power sources.
