UBX-AF-PHOENIX Cordless Screwdriver with Hydraulic Impact Mechanism

Categories: Controlled Electronic Screwdriving, M-Hand Tools · **Brand:** Uryu

Description

Cordless screwdrivers equipped with the newly designed Phoenix hydraulic impact mechanism, a contactless magnetostrictive transducer, and an encoder.

Features

The new springless hydraulic impact wrench design improves performance compared to conventional hydraulic impact wrenches

- More powerful
- Minimizes temperature-related variations

No preparation or preheating is required before use
16 programmable channels

Improved Service Life

The low oil pressure inside the pulse unit reduces pressure on the seals, minimizing leaks.
The newly designed Auto-Relief (patent pending) is not affected by deterioration in oil viscosity.
The large LED indicator allows operators to immediately check the OK/NOK status from any position.
Instant torque reading and torque curve displayed on the screen
The pairing of the screwdriver and controller can be configured using 3 methods:
1. Manual pairing via DIP switches
2. Pairing via software
3. Wi-Fi (Zigbee) pairing
Performs 320 screwdriving operations with a 100% charged battery

* The torque range is an approximate value. Select the appropriate tool based on the actual application
** The battery and charger are not included. Please use EY0L82 (Panasonic) for the charger.
*** Calculated under URYU test conditions. May vary depending on usage conditions.

Brand

Uryu

Founded in February 1915, Uryu specializes in the design and manufacture of high-quality, reliable industrial tools.

Throughout its history, the company has developed a comprehensive line of pneumatic, electric, and electronic tools for a wide range of industrial sectors. The company is particularly well-known for its hydraulic impact screwdriving solutions, which are available with pneumatic, corded electric, and battery-powered power sources.
