DLV-ASK Electric Screwdriver

Categories: M-Hand Tools, Torque-Controlled Screwdriving · **Brand:** Delvo

Description

The brushless series covers torques ranging from 0.4 to 7 Nm and is available either with the DLC70S-WGB power supply–which features ramp functions, adjustable speeds, and an I/O signal interface–or with the DLR70-WGB advanced piece-counting controller.

The optional spring included in the kit increases the torque to 0.4-1.6 Nm

Brand

Delvo

Nitto Kohki's Delvo electric screwdrivers are designed for industrial use, with a particular focus on torque control via mechanical clutches and current consumption control.

Reliability and precision are core values of the Delvo system, ensuring high performance and safety for operators.
