US-LD Torque Screwdrivers

Categories: M-Hand Tools, Uncontrolled, jerky, and stuttering tightening · **Brand:** Uryu

Description

The models in the US-LD series are direct-drive screwdrivers that stop when the target torque is reached.

The applied torque is controlled by the operator and the motor power. The torque level is adjusted via air pressure.
Recommended pressure: 0.6 MPa

Brand

Uryu

Founded in February 1915, Uryu specializes in the design and manufacture of high-quality, reliable industrial tools.

Throughout its history, the company has developed a comprehensive line of pneumatic, electric, and electronic tools for a wide range of industrial sectors. The company is particularly well-known for its hydraulic impact screwdriving solutions, which are available with pneumatic, corded electric, and battery-powered power sources.
