Handy 2000 Micro Nutrunner Screwdriver

Categories: Controlled Electronic Screwdriving, M-Hand Tools · **Brand:** ESTIC

Description

The EH2-RA series is designed for assembling small screws in the electronics, automotive, aviation, and aerospace industries.
The Micro Handy2000 electronic screwdriver, which is ESD-certified, ensures maximum safety in electrostatic discharge-sensitive areas and is fully compatible with the functions, connectivity, and software of the HANDY 2000 series.
Integrated torque sensor and servomotor for precise control from 0.2 to 2 Nm.
Complete traceability of torque and angle data.
Compatibility with various communication systems for flexible data management.
Lightweight design weighing 555 g, also ideal for integration onto robots or reaction arms.
Controller with a 4.3″ LCD touchscreen, featuring graphical display of tightening curves.
ESD-rated coating made of conductive resin to protect sensitive electronic components.

Brand

ESTIC

"A safer future for the world."

Estic develops comprehensive assembly solutions with the goal of creating safer work environments and increasingly reliable industrial products.

Its goal is to become the global leader in assembly technologies. The company offers fastening, pressing, and assembly systems for the automotive, aerospace, and other industrial sectors.

For nearly thirty years, it has been listening to its customers' needs, developing customized solutions, and providing expert technical support.
